

## **ORIGINAL**

S\_\_\_\_\_ School is committed to educating the whole child in a nurturing and holistic environment, and strives to develop its students intellectually, morally, spiritually, physically and creatively.

With a focus on excellence, small class sizes provide an ideal opportunity for a structured and nurturing environment.

Innovative programs during our extended day allow a strong emphasis on individualized instruction and hands on learning.

In addition to placing value in rigorous academic focus and outstanding achievement in a small class size setting, our qualified professionals continually connect with students to address individual needs in an effort to bring each student to grade level performance and above.

With special attention paid to the varied talents and interests of each child, S\_\_\_\_\_ School also addresses the importance of service learning and developing a sense of personal and community responsibility as an integral part of a well-rounded education.

---

## **EDIT/REWRITE**

S\_\_\_\_\_ School is committed to excellence and dedicated to educating the whole child.

To us, that means:

- \* Qualified professionals providing innovative instruction to create successful, individualized learning experiences
- \* Small class size for structure with flexibility, allowing time to focus on each child's talents, interests and needs
- \* A holistic approach valuing moral, spiritual, physical and creative growth along with rigorous academic strength
- \* Emphasis on personal and community responsibility as essential parts of a well-rounded education
